EyeMaginations

North Suburban Vision Consultants has incorporated a state of the art computerized video education system called “**EyeMaginations**” to help inform and educate our patients about a vast array of eye and vision topics. Using cutting edge 3-D video animation presented in all examination rooms as well as in our optical and contact lens areas, your doctors are now able to clearly describe and present detailed information on such interesting and important topics such as; eye diseases, contact lenses (including the variety of contact lens options as well as lens care and handling instructions), optical/glasses options, surgical eye treatments, and common eye conditions that affect vision.

EyeMaginations allows for patient interactive experiences between the doctor and patient or the computer and patient. Presented on high resolution flat panel computer screens, EyeMaginations presentations make understanding eye and vision conditions, optical options, contact lens therapies, and medical/surgical eye treatments “as clear as day”!

North Suburban Vision Consultants is proud to present EyeMaginations as another tool to achieve your best vision possible! Come in for your comprehensive eye care and experience the new world of eye and vision education with EyeMaginations.
